Advanced Materials & Medical Instruments (AMMI) Lab: Graduate Research Opportunity

Position: Graduate Research Assistant

About our research:
- Medical robotics
- Minimally invasive procedures
- Image-guided interventions
- Medical image analysis
- Modeling, simulation, and control
- Flexible steerable needles
- Cancerous tissue characterization
- Medical device design
- Treatment planning
- AI in medicine

Who we are looking for:
- Graduate students interested to do research related to healthcare
- Candidates with high self-motivation, experimental and robotic background, and interests in medical robotics, image processing, control, and programming

What you’ll gain:
- Research experience in biomedical field
- Opportunities to work along with physicians
- Opportunities to publish your work
- Opportunities to attend and present at conferences
- Professional development and networking skills

Contact:
- konh@hawaii.edu
- If interested, please send your resume or CV including your GPA, TOEFL or IELTS, and GRE scores to Dr. Bardia Konh
